we build value

## Associate Engineers & Internships

# Engineering Intern

The Engineering Intern is assigned to a company location for a 10-12 week, full-time, summer program. Each intern will be provided a mentor who will assign daily activities and assist with training. Engineering Interns will be given a list of goals to complete throughout the summer and summarize their experience with a final presentation. Opportunities are available in engineering, estimating, cost control, safety, environmental, digital modeling, and mechanical.

# Associate Engineer

Associate Engineers are bachelor's degree graduates with 0-2 years of A/E/C experience interested in pursuing a career in heavy civil construction. The Associate Engineer assists with the major functions within company operations. The position is exposed to a variety of both office and field responsibilities that include scheduling, estimating, quality control, and quantity tracking.

# Culture

Our commitment to excellence is the foundation for all that we do. Our greatest fulfillment comes from an honest-day's work, a job well done, and living our core values.

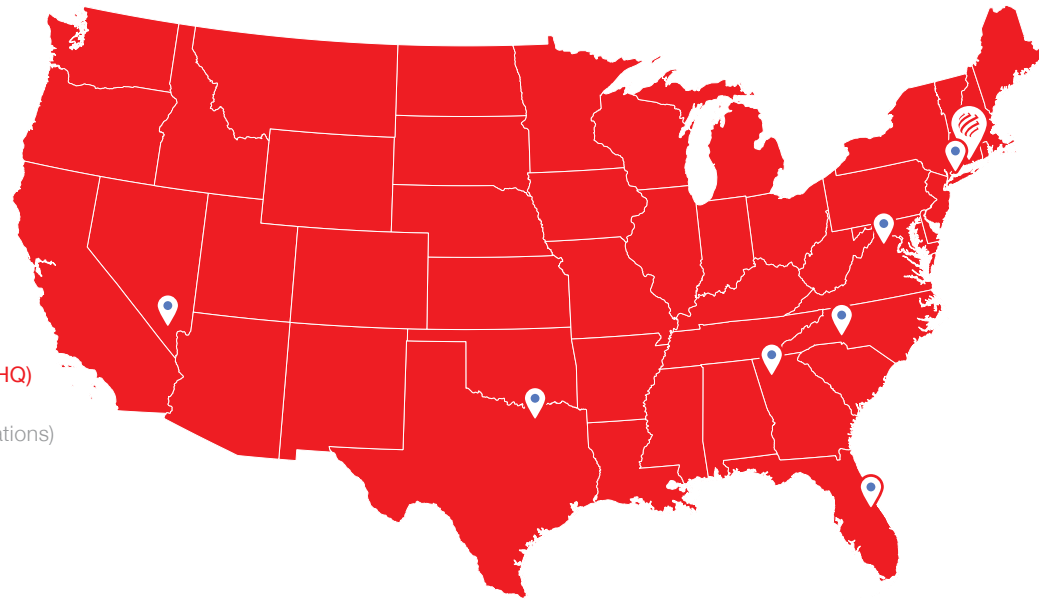

An environment of approachability, collaboration, and teamwork expands across every department. every level of leadership, and to every employee.

As an employee, you are our most valuable asset, and we want you to be safe and healthy in every aspect. For this reason, we hold ourselves to the highest standards for safety, integrity, and trust.
